Keerthi Chirumamilla

Data Engineering | Data Analytics | Python & SQL

Koblenz, Germany | +49 155 1152 6023 | chirumamillakeerthi16@gmail.com
Portfolio: portfolio-pied-pi-12.vercel.app | GitHub: github.com/chirumamillakeerthi22
LinkedIn: linkedin.com/in/keerthi-chirumamilla-65b7a3226

PROFESSIONAL SUMMARY

Data-focused developer with hands-on project experience in SQL and PostgreSQL data modelling, REST API integration and data validation with schema checks and automated tests. Built and deployed two database-backed web applications (Supabase, Vercel) with authentication and Row Level Security. Skilled in Python data cleaning, exploratory analysis and Power BI / Tableau dashboards. Seeking Werkstudent, internship or junior roles in data engineering, data analytics and BI.

TECHNICAL SKILLS

Data & Databases: SQL, PostgreSQL, MySQL, relational data modelling, SQLAlchemy, versioned SQL migrations, Row Level Security, REST API integration, data validation (Zod, Pydantic)
Analysis & BI: Python, Pandas, NumPy, Matplotlib, exploratory data analysis, data cleaning, Power BI, Tableau, Excel
Machine Learning: Linear Regression, Random Forest, LSTM, model evaluation, forecasting
Backend & Web: FastAPI, Django, Next.js, React, TypeScript, JavaScript, Java EE, JWT, Gemini API
Cloud & Tools: Supabase (PostgreSQL, Auth, Edge Functions), Vercel, AWS and Google Cloud (foundational), Git, GitHub, Vitest

KEY PROJECTS

Veyoraq – AI-Powered Personal Styling Platform (Personal project) 10/2026 – Present
Next.js, React, TypeScript, Supabase (PostgreSQL, Auth, RLS), Gemini API, Zod, Vitest, Vercel
Live: veyoraq.vercel.app | GitHub: github.com/chirumamillakeerthi22/Veyoraq

- Built and deployed a full-stack styling web app whose server-side API routes call the Gemini API for structured outfit, colour and fit recommendations.
- Validated all requests and AI responses with Zod schemas; added rate limiting, input limits and server-side secrets.
- Designed the PostgreSQL (Supabase) data model with versioned SQL migrations, authentication and Row Level Security; wrote 531 passing automated tests.

InvestTrack – Stock Portfolio Platform (Personal project) 08/2026 – 09/2026
React, Vite, FastAPI, SQLAlchemy, PostgreSQL, Supabase (Auth, Edge Functions), JWT, Finnhub API, Recharts, Vercel
Live: invest-track-flame.vercel.app | GitHub: github.com/chirumamillakeerthi22/investTrack

- Integrated the Finnhub REST API (quotes, search, price history) through Supabase Edge Functions that keep the API key server-side; built holdings, watchlist and profit/loss views.
- Modelled users, stocks and holdings in PostgreSQL with SQLAlchemy (exact Numeric types); FastAPI backend verifies Supabase-issued JWTs.

INTERNSHIP EXPERIENCE

AI-ML Virtual Internship – Eduskills (AWS Academy) 05/2023 – 07/2023

- Built machine learning and deep learning models in Python; applied data preprocessing and evaluated models with standard metrics.

Data Analytics Virtual Internship – Eduskills 12/2022 – 02/2023

- Cleaned and transformed datasets with Excel, SQL and Python; performed exploratory analysis to derive business insights.

ACADEMIC PROJECT

Air Quality and Pollution Forecasting (Python, Pandas, NumPy, Power BI, Tableau)

- Compared Linear Regression, Random Forest and LSTM models for pollution forecasting using Pandas and NumPy; visualised AQI results in Power BI and Tableau.

EDUCATION

M.Sc. Web and Data Science – University of Koblenz, Germany 10/2025 – Present
B.Tech, Computer Science Engineering – KL University, India (CGPA 9.35) 08/2021 – 05/2025

CERTIFICATIONS & LANGUAGES

Certifications: Google Cloud Practitioner (07/2024); AWS Cloud Practitioner (12/2023); Red Hat Enterprise Application Development (Java EE) (08/2023)
Languages: English – fluent | German – A2 (currently learning)
